

- 460 light fixtures
- Consumption: 6 kWh at peak for the whole installation

"We chose wtec smartengine because we wanted to install an innovative, greener LED lighting concept than the norm in our educational facilities. We are proud to pioneer with wtec and use lighting based on usage data, such as temperature and movement, in a balanced way. Together with wtec, we are showing our students a very special version of green energy."

– Prof. Dr. Kexel

FACTS:

- 12 smartengines and one director for 4.500 m²
- Energy saving by luminaires over 80%
